32 Vassar Street – Cambridge, MA 02139 – Office G578

☎ (401) 578 2541 • ✉ cpmusco@mit.edu

Education

Massachusetts Institute of Technology

Cambridge, MA

Ph.D. Candidate, Computer Science – Theory of Computation

2013 – present

Advisors: Jonathan Kelner, Martin Rinard

Yale University

New Haven, CT

B.S. Computer Science, B.S. Applied Mathematics

2008 – 2012

CS Thesis: Graph Constructions for Machine Learning (under Daniel Spielman)

AM Thesis: Fast Discrete Laplace Transforms (under Vladimir Rokhlin)

Research Interests

I am interested in dimensionality reduction and its application to randomized numerical linear algebra, sketching and streaming algorithms, and machine learning. I also work on problems related to algorithmic graph theory and collaborate with MIT's Center for Resilient Software on quantitative approaches to computer security and approximate computation.

Academic Positions

Massachusetts Institute of Technology

2013 – present

Research Assistant

Teaching and Mentorship

Research Science Institute/MIT

2014

Summer Research Advisor

Mentored Christopher Wang, a high school student participating in the prestigious RSI summer program.

- Designed a project on concurrent data structures under the direction of Professor Martin Rinard.
- Chris' paper, "Relaxation of a Concurrent Disjoint-Set", was selected as one of 10 program finalists.

Yale University

Teaching Assistant, Introduction to Computer Science

2012

Covered functional programming, boolean algebra, formal language theory, and basic complexity theory.

Teaching Assistant, Introduction to Programming

2011

Led weekly section for 15-25 students covering basic Java programming. Tutored 5-6 students individually.

Undergraduate Grader, Introductory Calculus

2009 – 2010

Scored problem sets and provided explanations and solutions for students, as well as feedback to the professor.

Honors and Awards

National Science Foundation

2014

Graduate Research Fellowship

Yale University

2012

Cum Laude, Distinction in Both Majors

Publications

Conference Papers.....

[Single Pass Spectral Sparsification in Dynamic Streams](#). Michael Kapralov, Yin Tat Lee, Cameron Musco, Christopher Musco, Aaron Sidford. *FOCS* 2014. (Invited to SICOMP Special Issue).

[Uniform Sampling for Matrix Approximation](#). Michael B. Cohen, Yin Tat Lee, Cameron Musco, Christopher Musco, Richard Peng, Aaron Sidford. *To appear in ITCS* 2015.

[Principled Sampling for Anomaly Detection](#). Brendan Juba, Fan Long, Christopher Musco, Stelios Sidiropoulos-Douskos, Martin Rinard. *To appear in NDSS* 2015.

Other.....

[Dimensionality Reduction for K-Means Clustering and Low Rank Approximation](#). Michael B. Cohen, Samuel Elder, Cameron Musco, Christopher Musco, Madalina Persu. Preprint.

Talks

Single Pass Spectral Sparsification in Dynamic Streams

Foundations of Computer Science (FOCS)

Oct. 2014

Harvard University, TOC Seminar

Nov. 2014

Dimensionality Reduction for K-Means Clustering

Massachusetts Institute of Technology, Theory Lunch

June 2014

Service

Reviewer.....

Network and Distributed System Security Symposium (NDSS)

2015

Professional Experience

Software Engineer, Data Team

Seattle, WA

Redfin

2012 – 2014

Developed backend Java infrastructure for internet-powered real estate startup.

Elysium Digital

Cambridge, MA

Consultant

Summer 2011

Provided technical expertise in software patent cases at leading litigation consulting company.

Developer

New Haven, CT

Amicus

2010 – 2011

Built tools for political campaign management and social fundraising at early-stage startup.

Intern, Asset Finance Group

New York, NY

Moody's Investors Service

Summer 2009

Established and monitored bond ratings on asset securitizations.

Intern, Natural Resources Conservation Service

East Greenwich, RI

U.S. Department of Agriculture

Summer 2007

Collected and analyzed data for state conservation and research projects.
